

WATER RESOURCES ENGINEER

DeWild Grant Reckert and Associates Company (DGR) is a growing, multi-discipline consulting engineering firm with headquarters in Rock Rapids, Iowa, and currently has career opportunities in its Water Resources Department.

DGR's Water Resources Department specializes in the design of wells, water treatment, pumping, storage, and distribution systems for rural water systems and municipalities throughout the region. Typical projects involve studies and cost estimates for improvement or expansion of existing rural or municipal water systems followed by the design, bidding, and construction administration of the facilities that are part of the project.

We are seeking Civil or Agricultural Engineering graduates (MS preferred) with an emphasis in water supply, treatment, pumping, storage and distribution system design course work. Typical work assignments involve design, plan preparation, drafting, construction administration, and construction observation. Knowledge of Excel and AutoCAD computer design software desired. Experience with water distribution system modeling software and GIS software would be a plus. Communication skills and the ability to work with a wide variety of clients are important. Applicant must be willing to relocate to within commuting distance of Rock Rapids, Iowa.

Our firm offers a competitive salary and benefits package with opportunities for advancement and ownership in a challenging and professional work environment. Qualified individuals should email or send a resume and cover letter with available start date to the address shown below.
